## Where do chemistry-using professionals work?

In 2019, the total number of chemistry-using professionals in the UK was estimated to be 275,000. This includes

- around 6,000 academic staff
- approximately 41,000 chemistry and general science teachers in education
- about 228,000 others who were in employment. ${ }^{2}$

Figure 1:
Chemistry-using professionals in each of the main occupational categories in the UK in 2019

${ }^{2}$ Sector split uses ONS Standard Industry classifications - please see the full report for more details.

## What is a chemistryusing professional?

Chemistry-using professionals encompass a wide range of occupations; from academic chemists in universities and professional chemical scientists in industry, to chemistry teachers in schools and those in sales and marketing roles.
Occupations fall into four distinct groups. The classification of each group does not reflect the level of importance of the occupations or roles themselves, only the extent to which chemistry knowledge is required.
Group A includes occupations where deep chemistry knowledge is of highest importance (academics, professional chemists), while Group D includes those where deep chemistry knowledge is less important,
but still a significant component of the role (sales, marketing, some engineering and science professionals). ${ }^{1}$
Table 1 sets out the occupations of chemistry-using professionals and typical job roles, using standard occupational classifications. (A breakdown of the skills, knowledge and abilities that apply to each group are included in the full report).

## Group A

occupation - Chemical engineers -Chemist - Chemistry teachers postsecondary - Biochemists and biophysicists - Material scientist

JOB ROLE(S)
-Chemical scientist - Chemical scientist - HE teaching professionals

- Biological scientists and biochemists - Chemical scientist

## Group C

JOB ROLE(S)

- Engineering professionals not elsewhere classified - Laboratory technicians - Quality assurance and regulatory professionals - Quality assurance technicians
