This activity has shown me that:

- I can work safely with lab equipment
- I finish my work on time
- I like working with people
- I can support others
- I can explain what I am doing
- I can work through problems
- I can teach others things I have learned
- I can work things out step-by-step
- I am creative
Astrochemist

“An Astrochemist investigates the chemistry and physics of the regions of space between the stars.”

- I can support others
- I can explain what I am doing
- I can teach others things I have learned
A Sustainability Manager works with businesses and chemists to advise them on being more green through effective recycling and sustainable processes.

- I can work things out step-by-step
- I like working with people
- I can explain what I am doing
Analytical chemist, healthcare

“An Analytical Chemist does research on human breath samples to potentially understand and diagnose diseases such as asthma and cancer sooner.”

- I can work safely with lab equipment
- I like working with people
- I can explain what I am doing
Head of chemistry and teacher

“A Head of Chemistry at a school teaches and oversees the work that goes on in a secondary school chemistry department.”

- I like working with people
- I am creative
- I can work things out step-by-step
Analytical technician, plastics

“An Analytical Technician develops ways to alter the structure of plastics so they become biodegradable in the natural environment.”

- I can work through problems
- I can explain what I am doing
- I can work safely with lab equipment
