How does Joseph make a difference?

I’m a Laboratory Analyst (Apprentice) at Thames Water where I ensure there is clean, safe water for over 15 million people living in the UK, while also studying towards a chemistry degree.

What’s involved?

- Analysing water samples from homes, rivers and other sites
- Using lab techniques to produce, record and verify data
- Studying for a chemistry degree

Skills

- Communication
- Working in a team
- Technical work

Minimum qualifications

- Three A-levels with a minimum of C grade in chemistry or biology, with five GCSEs at grade 4 and above

Salary

- Starting salary £20,000 – 28,000 a year
- Industry median salary £37,400 a year

In 2017, UK clean water access was 99.84%. Safe water is essential for everything from drinking to washing our hands. Without chemistry, our water could become contaminated and unsafe.

“If you want to consider a career in chemistry, think about a degree apprenticeship.”
